Report: Providing of consulting services to Czech business entities

As part of the consulting services provided to Czech company BARD s.r.o. were: the most suitable strategy for entering the Japanese market was proposed, business channels for marketing products were identified and price benchmarking was determined with respect to similar products already in use in Japan. Follow-up steps to market the products were recommended. As part of the creation of partner network, a total of 86 selected companies in the field of production and distribution of veterinary products and cosmetics were contacted. Feedback from potential partners was mapped, including recommendations for the Czech side regarding the specifics of the Japanese market - like a requirement for registration of veterinary products and cosmetics, a recommendation on how to register these products in Japan etc. We provided a list of recommended TOP potential partners for further negotiations. As part of after care and follow up support, further communication between the Czech and Japanese sides was coordinated. Due to the current COVID-19 pandemic situation and the closed borders in Japan, it was not possible for the company to hold face-to-face meetings in Japan. The communication continued in online mode, and future personal meetings will take place when the situation allows.
